

November 12 - 14, 2024

Hybrid Format: Virtual (Zoom) and In-Person (Rich Earth Hub in Brattleboro, VT and... a hub near you?)

The Rich Earth Summit is the global event dedicated to advancing urine nutrient reclamation, bringing together experts, practitioners, and industry leaders to foster collaboration and innovation in this field. This year we are also opening the Summit to research and mid/large-scale projects that include full toilet waste reclamation.

Partnering Opportunities

Help us make the Rich Earth Summit impactful for the peecycling movement! Partner with the Rich Earth Institute to shape the conversation and drive meaningful change.

Host An In-Person Hub

Host a satellite hub to participate in the Summit's virtual offerings. In-person hubs can foster local/regional collaboration with peecycling enthusiasts near you! You may also wish to organize in-person meals, gatherings, or additional events before or after the Summit to keep the conversation flowing. If you plan to host a hub, please let us know! We can add it to our Summit website and help get the word out.

Submit a Presentation

The open call for presenters is now live on the Summit website! The submission deadline is **August 2, 2024**. Presentations are invited in multiple formats including:

- **Lightning Talk** (10 minutes) - present recent research or projects on a range of suggested topics to be organized into themed panels
- **In-depth Presentation** (20-30 minutes) - dive deeper on a topic or project (a limited number of in-depth presentations are available; speakers may be invited to present as a lightning talk instead)
- **Introductory Presentation** (10-20 minutes) - intended for beginners to the topic of urine reclamation; presentations about the basic why's and how's of human waste recycling are encouraged
- **Virtual Tour** (10 minutes) - submit a pre-recorded tour of your urine reclamation lab or project

Organize a Roundtable Discussion

Have a topic, project, or question that warrants more discussion than a single panel or project can allow? Reach out to us about organizing a roundtable discussion with experts in the field! 60 minute slots are available for a select number of roundtable discussions.

Golden Droplet Awards

Help us encourage youth submissions to the Rich Earth Summit this year! See the Golden Droplet flier for details about this new Summit feature.
